PRODUCTION EXCELLANCE SYSTEM

PES Summary

PES – What is it?

- **User friendly application which helps in monitoring the process behaviour.**
- **Tons of data can be quickly seen with a graphical representation.**
- **Analyse data in many ways, i.e., Control, Trend charts, Pareto & analysis of Standard deviation, CpK/Ppk for each parameter & overall status of a process.**
- **Facilitates to record corrective actions for deviations and analyse the root causes. Reminds the process stake holders in a regular frequency if notifications are unattended.**

PES – What is in it?

- **Analysis of a process at any time, from anywhere by accessing PES App. through browsers.**
- **Top concerns of plant and top concerns of the processes are available by click of a button.**
- **PpK Trends and Pareto for all parameters calculated automatically & being monitored.**
- **Summary of pending corrective actions from any process at any time.**
- **Report of CAPA taken at the process for any parameter(s) for a selected period.**
- **3 years rolling data availability in the App. & all the actions, trend, reports can be accessed, seen at any time.**
- **Option to upload missing data manually from external source (in case external [eg., SAP] source is down for several hours/days).**
- **Option to upload missing process data in case of App. being down for several hours/days.**
- **Many more...**

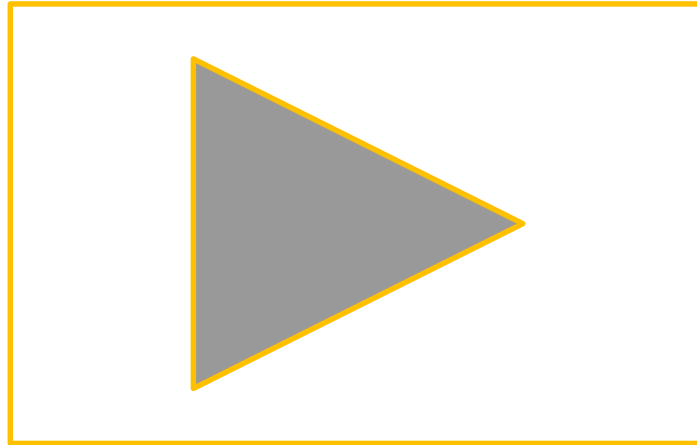

PES – Why is it?

- **Not everyone can buy super expensive systems.**
- **Missing data driven culture in the manufacturing area.**
- **Industry 4.0 solution tool for managers to remotely monitor shop floor and to make decision towards operational excellence.**
- **Acts as a central nerves system for the processes.**

WHAT IS BETTER?

PES APPLICATION	OTHER TOOLS
Completely customized	No similar ready tool, not possible to implement without change
No expertise required	Minitab: require expert to operate
Corrective action / comments can be entered and stored	Not possible to update corrective actions
Quick view of overall health of processes	Analyse specific parameters only
